

Tenderfoot Lodge

Guidelines on Replacement Blinds for Windows and Sliding Doors

Updated 4/11/22

The replacement of window and sliding door blinds at Tenderfoot Lodge does not require Board review and approval.

However, the following guidelines must be adhered to, in order to maintain a consistent appearance from the exterior of the building.

- Blinds installed on windows should be horizontal 2" natural wood, matching the existing blinds and window trim.
- Blinds on sliding glass doors should be horizontal 2" natural wood matching the existing blinds and window trim, or vertical blinds in a light earth tone (almond or beige).
- If horizontal natural wood blinds are used for sliding doors, either two single blinds, one for each half of the slider, or one single blind to cover both sides of the slider can be installed.

White blinds of any type are not approved for installation on windows or sliding doors.

Owners have had success finding matching blinds at the following vendors:

- Mountain Comfort - in Frisco – 970.668.3661 and
- Home Depot – nationwide
