

## Berm - South End - Phase One

copy of  
original

2. Main Line runs West to fence post #1. The line to #1 is obvious since new native-sown grasses are to the north, pre-existing wild area to the south.
3. Immediately west of the conifer/aspen at Hollis' end of the tarmac, the mainline is located  $27\frac{1}{2}'$  from the tarmac.

1. From the front wall of Bldg S-1, the manhole cover touches the sight-line looking south. The main irrigation line runs south; parallel to the sight-line. 3' east of the ⚭ of the manhole cover - for 18' where it turns west. A new control box is located 5' west of this  $90^\circ$  bend.
